floating gauntlet; feels fresh and varied each time. Thereu2019s a sense of constant progression. With tokens going towards cosmetics, useable equipment, world shortcuts and unlockable abilities. I found that the glide propeller worked wonders for not falling into the void! Excellent array of sfx, music. The examiner is fully voice acted. The dialogue further extending the comedy and overarching goals of the game. Controls are tight reminds me of Super Mario 64. The environments and lighting effects have become even more polished since the trailer.. I love the graphics and the music, what little I've heard of the voice acting is also great, and the gameplay is also fun. I don't like that once I lose all my lives I need to restart from the beginning each time I play. Because I'm unlikely to ever make it through the entire game, that just makes me more likely to look for something else to play once I'm dead rather than redoing the same levels again and again and again and again and . Also, I recommend playing with an xbox controller. Playing on a keyboard and mouse was tough.. The best parts of 3D platforming mixed with smart level generation helps this game keep fresh for a long time.
